

Acoustic insulation
against impact
noise for floors and slabs

TEXCORK dB

THE +

Good insulation against impact noise with **low thickness**

Product with **80% recycling**

ecological and recyclable

Compressibility under long-lasting load

Allows **direct grip** of ceramic tile

easy to install

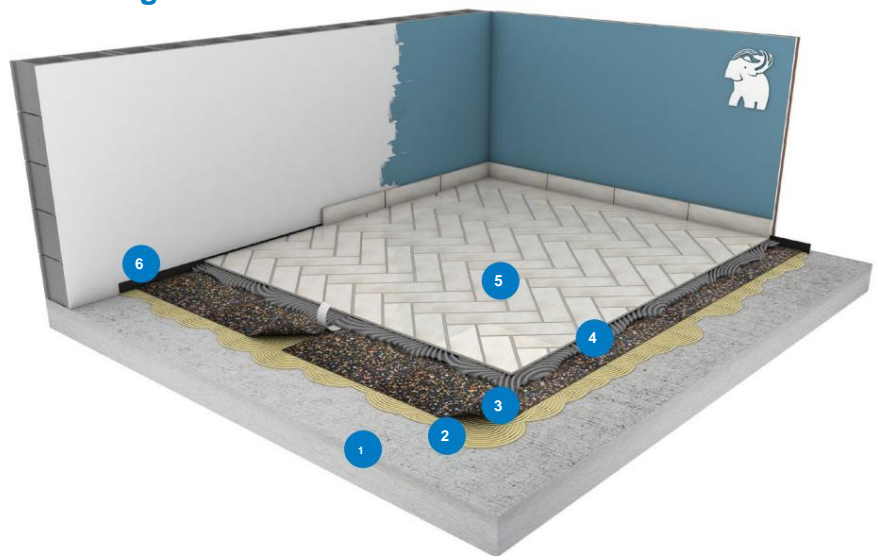

TEXCORK dB

Sheet based on agglomerated cork and recycled rubber, for application as acoustic insulation against impact noise from floors and slabs, in new construction and rehabilitation.

$\ddot{y}LW = 15$ dB

> Applications

on wrought

1 Wrought

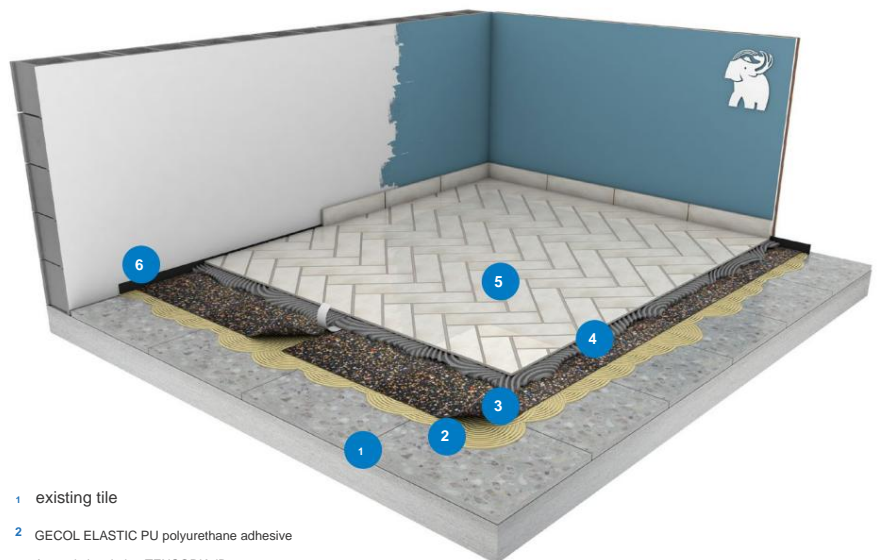

2 Resin-cement adhesive
GECOL G100 FLEXIBLE
PREMIUM / G100 SUPERFLEX

3 Acoustic insulation TEXCORK dB
4 Resin-cement adhesive
GECOL G100 FLEXIBLE
PREMIUM / G100 SUPERFLEX

ceramic tile 5

6 Texfon self-adhesive strip

on existing soil

1 existing tile

2 GECOL ELASTIC PU polyurethane adhesive
3 Acoustic insulation TEXCORK dB
Resin-cement adhesive GECOL G100 FLEXIBLE 4
PREMIUM / G100 SUPERFLEX

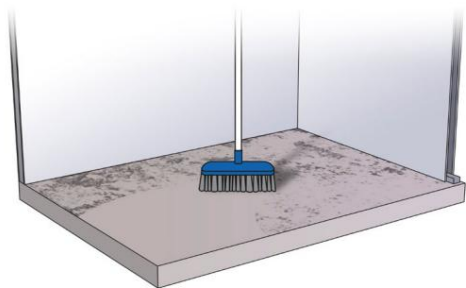

ceramic tile 5

6 Texfon self-adhesive strip

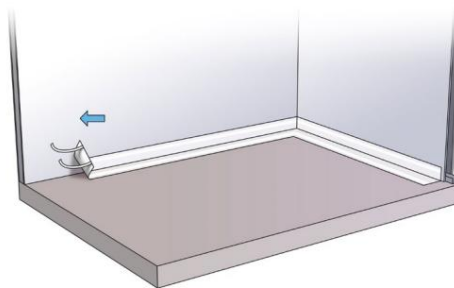

BENEFITS

- Impact noise level reduction $\ddot{y}Lw$ **15 dB**
- **Creeping** (long term deformation under load) **< 0.5 %**

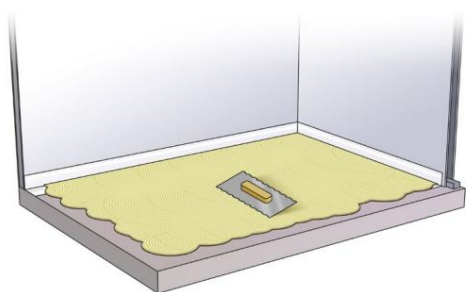

> Commissioning

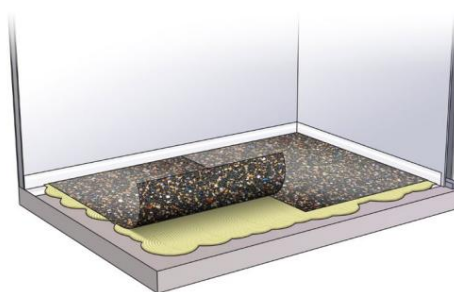

STEP 1:
Clean and
sanitize the support.

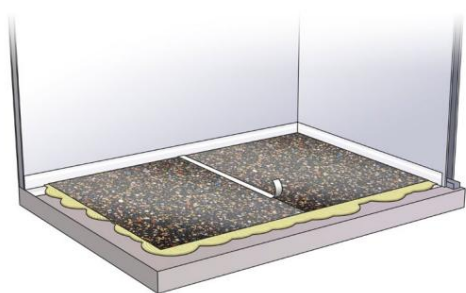

STEP 2:
Install the Texfon
self-adhesive
perimeter band.

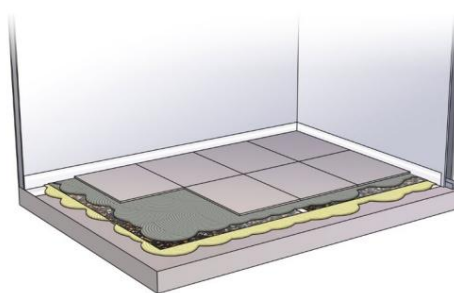

STEP 3:
Apply Texcork
dB acoustic
insulation adhesive.

STEP 4:
Install the
Texcork dB
sheets.

STEP 5:
Repeat the operation
sealing the joints
with tape.

STEP 6:
Apply adhesive
to fix the flooring
and place the
tiles.

> Presentation

Code	Product	Definition	Presentation	Packaging
237423	TEXCORK dB	Agglomerated cork sheet and recycled rubber	15 x 1m rolls	14 rolls/ pallet

*Texcork dB may present color variations as it is a recycled product, always maintaining the same features.
